Subject: Complaint 50441 - Safer Road Humber

Dear Mr Frances

Further to the email you sent to Ruth Gore dated 23 April 2012 regarding Safer Roads Humber, as Ruth's manager I have been asked to respond to your complaint. I hope that the following addresses your concerns:

Safer Roads Humber follows the methodology supplied by the Department for Transport (DfT) in calculating its annual report. When safety camera partnerships were first created they were required to complete a DfT database which already had pre-set calculations in it to measure performance. Safer Roads Humber (formally Humberside Safety Camera Partnership) chose to publish its performance data in line with the methodology supplied by the DfT in order to be transparent.

I have received confirmation from Safer Roads Humber that they will continue to publish their annual report following the nationally accepted methodology supplied by the DfT and they have no plans to change this.

Kind regards

Angela Dixon
